

Technical Data Sheet

Original Hanau SunCare Magnetic Chokes for UV-Tanning Lamps Ballast 1000 HP

Article No.: 80006733

Electrical data:

Nominal wattage of UV-Lamps:	1000 W
Nominal lamp current:	10,3 A
Line voltage:	230 V
Mains frequency:	50 Hz
Electrical contacts for:	220-230-240-IGN
Connection:	Plug in terminals 1,0 – 6,0 mm ²

Operating data:

Temperature rise:	70 K
Intrinsic losses:	72 W (25°C copper temp.)
Max. permissible housing temperature tw:	130 °C
Parallel compensation:	100 µF ±10% 250 V
Weight:	9,4 kg

Geometric Data:

Approval symbol:

Anticipated service life:

10 years

(for continuous operating with a ballast temperature of 130°C)

The given figures represent typical data based on average values achieved under standardized conditions in the laboratory. For physical/technical reasons operating values are subject to piece to piece variation.
